

**SUGARCREEK TOWNSHIP
RESOLUTION NO. 2014.10.06.03**

IN RE: Approving the Amended Solid Waste Management Plan of the Greene County Solid Waste Management District

WHEREAS, the Greene County Solid Waste Management District Policy Committee is responsible to prepare and amend the Greene County Solid Waste Management Plan; and,

WHEREAS, by Resolution #2014-9-17-1 the Greene County Solid Waste Management District Policy Committee adopted the Amended Solid Waste Management Plan on September 17, 2014; and,

WHEREAS, pursuant to Ohio Revised Code Section 3734.55(B) the Board of County Commissioners and the legislative authority of each municipal corporation or township under the jurisdiction of the District must approve or disapprove the Amended Solid Waste Management Plan by ordinance or resolution; and,

WHEREAS, this body has reviewed the Amended Solid Waste Management Plan and considered it at a duly called public meeting; and,

WHEREAS, the Amended Solid Waste Management Plan furthers the public interest,

NOW THEREFORE, BE IT RESOLVED, the Amended Greene County Solid Waste Management Plan adopted on September 17, 2014, is hereby approved by this Board of Trustees on October 6, 2014.

FURTHER BE IT RESOLVED, a copy of this Resolution of Approval shall promptly be delivered or cause to be delivered to the Greene County Solid Waste Management District Policy Committee at Greene County Environmental Services, 2145 Greene Way Boulevard, Xenia, Ohio 45385.

Greene County Solid Waste Management Amended Plan Overview

As required by the Ohio Revised Code Section 3734.53, Greene County has prepared the Amended Solid Waste Management Plan (Amended Plan). The Solid Waste Management District Policy Committee (Committee) is responsible to complete the Amended Plan. Committee membership is established by the Ohio Revised Code. The seven members of the Committee include representatives from the County Commission, Largest Municipality, Township Trustees, Health Department, Citizen, Industrial/Commercial Waste Generator, and the Public.

The Amended Plan must comply with Ohio Revised Code Section 3734.53. The Ohio Environmental Protection Agency used this ORC section to develop the "District Solid Waste Management Plan Format". To compose the Plan, the Committee must follow the instructions and directions listed in the Format.

The Amended Plan is a complex document that contains nine sections. To assist community leaders and the public to review the Amended Plan, an overview of each section is provided.

Section I. Introduction

Greene County Solid Waste Management District's (District) current Plan was approved by OEPA in 2008 and it is required to be updated in 2014. The reference or baseline year for the Amended Plan is 2011. Members of the Policy Committee, Technical Advisory Committee, and subcommittees are listed plus the District's contact information. The final component is a process to determine a material change in circumstances. This will allow changes to the Plan after it is approved in 2015 and prior to the 2021 scheduled update

Section II. Executive Summary

The Executive Summary as outlined by the format includes a description of each section.

Section III Inventories

In 2011, District generated waste was taken to four sanitary landfills in Ohio. Two of these, Stony Hollow sanitary landfill in Montgomery County and Rumpke's sanitary landfill in Hamilton County directly accepted over 85% of the wastes disposed. Additionally, two transfer facilities in Montgomery County and one in Fayette County collected District waste prior to it being landfilled.

Recycling programs are offered through many government agencies and private vendors. There are three waste hauling companies that provide solid waste disposal and recycling services to residents and businesses in the District.

In addition, there are several composting facilities that are operated by the private sector. Three of these facilities are located in the District and four are just outside the District's borders. In addition, one Village hosts a composting operation. These operations provide an outlet for leaves, grass, and brush.

Section IV Reference Year Population, Waste Generation, and Waste Reduction

Population projections for the planning period were secured from the Ohio Development Services Agency.

In 2011, the Residential/Commercial sector's generation of solid waste was 159,709 tons. Included in this amount are 22,616 tons of materials that were recycled and 25,870 tons of yard waste that was composted. The District's recycling percentage for 2011 was 30% which exceeds the State's goal of 25% for the Residential/Commercial Sector.
